KELVIN PAA KWESI ADJEI

Software Developer | Engineer
📍 Charlotte, NC 28273
✉️ kpkadjei1@gmail.com | 📞 (484)-908-0855

PROFESSIONAL SUMMARY

Innovative and results-driven software developer with **5 years of experience** designing, developing, and implementing technology solutions that drive business value. Expertise in **.NET, Angular, React, SQL, Rancher, Java, Python, AWS, Kubernetes**, and **Azure** with a strong focus on delivering high-quality software products. Adept at collaborating with cross-functional teams, optimizing system performance, and leveraging cloud and containerization technologies for scalable solutions. Passionate about continuous learning, mentorship, and innovation.

TECHNICAL SKILLS

- **Programming Languages:** C#, .NET, Java, Python, JavaScript.
- **Frameworks:** Angular, Node.js, React.
- **Database Technologies:** Microsoft SQL Server, MySQL, NoSQL, MongoDB.
- **DevOps & Tools:** Docker, Kubernetes, CI/CD (Rancher), ETL processes, Active Reports.
- **Cloud Platforms:** Azure, AWS (Private/Public cloud solutions).
- **Other:** WinForms applications, SQL Queries, Relational database design, Containerization, Testing & Debugging.

PROFESSIONAL EXPERIENCE

Charter Communications – *Charlotte, NC*

Software Developer *(Oct 2022 – Present)*

- **Key member of the CORPORTAL team**, responsible for building and maintaining **agent performance applications** that support over **1.5 million users**.

- Developed and enhanced the **Performance Tracker Application**, which uses **dynamic forms** to capture agent-customer interactions. This data, combined with **audio and video call recordings**, is used to generate key performance metrics.
- Contributed to the **Scorecard Application**, which calculates agent **performance metrics**, evaluates against threshold scores, and determines **promotion eligibility** based on performance trends.
- Enhanced the **Coaching Application**, enabling leadership to review agent performance insights and provide personalized coaching strategies for **career progression and skill improvement**.
- Designed and optimized **SQL database schemas**, queries, and **ETL processes** to ensure seamless integration of agent performance data across applications.
- Developed and deployed **scalable web applications** using **.NET, Angular, Kubernetes (Rancher), and CI/CD pipelines**, ensuring high availability and maintainability.
- Collaborated with cross-functional teams to **enforce coding standards, improve system security, and optimize application performance**.
- **Directly contributed to business objectives** by supporting agent retention strategies, providing clear career growth pathways, and improving overall workforce engagement.

Itlize Global LLC – *Piscataway, NJ*

Microsoft Cloud Associate Specialist *(Aug 2021 – Oct 2022)*

- **Completed extensive training** in **.NET, Angular, and Azure** to develop and deploy **cloud-native applications** for enterprise clients.
- Contracted as a **Senior Software Developer** to various third-party companies, helping them transition from **legacy .NET WinForms applications** to **modern .NET/Angular frameworks** for enhanced scalability, security, and performance.
- Designed and deployed **containerized applications** using **Kubernetes (K8s)**, improving **efficiency, reliability, and cloud integration**.
- Provided **business-critical solutions** to clients, including:
    - **AssistRx (Orlando, FL)** – Built applications to help patients **track prescriptions**, connect with healthcare professionals, and streamline **prescription approvals** through **digital consent forms**, reducing reliance on traditional faxing and accelerating response times.
    - **Charter Communications** – Contributed to the **Credit Calculator team**, developing an application that **automates customer credit calculations** for issues such as **service outages and billing errors**, enhancing operational efficiency.
- Ensured **secure and seamless cloud deployments** on **Azure**, following best practices for DevOps, CI/CD, and enterprise cloud solutions.

- Developed **complex SQL procedures, views, and functions** to support real-time data processing and reporting.

JP Morgan Stanley – *Remote*

Software Engineer Intern *(June 2019 – Aug 2019)*

- Developed **mobile and digital banking features** to enhance customer experiences across **5,000+ retail branches** and **17,000 ATMs**.
- Engineered **scalable software solutions**, integrating telemetry, monitoring, and log aggregation for **real-time performance tracking**.
- Utilized a diverse tech stack, including **Node.js, Python, Java, .NET, React, Angular, MySQL, and NoSQL**.

PROJECTS

Property Management Console

- Developed a **real estate management platform** to streamline property listings, tenant management, and rent payments.
- Integrated **real-time dashboards** for property tracking and analytics.
- Deployed the **pre-released version at pmconline.global**.

UniShare iOS Application

- Designed an **iOS marketplace app** enabling Swarthmore College students to **buy, sell, and rent** goods from peers.

Water Level Monitoring IoT Device

- Built an **IoT-based water level monitoring system**, integrating real-time sensor data with a **custom dashboard** for visualization.

URSIM Robot Simulator

- Developed a **virtual robot simulator** for educational purposes, allowing users to navigate robots in a **3D virtual environment**.

EDUCATION

Swarthmore College – *Swarthmore, PA*
Bachelor of Science in Engineering & Computer Science *(Sep 2017 – May 2021)*

HOBBIES & INTERESTS

⚽ Soccer | 🏃 Running | 🎬 Movies | 🌿 Outdoor Activities | 💻 Software Development
